

MAKING FROM HOME PAPER

Here are some projects to try while you're at home, using paper! You may also require a bit of glue (pva or a gluestick), and maybe a ruler and scissors to cut paper to size, depending on the build. Paper-folding is where we start, but don't be fooled; as they get more complex, they will get more and more challenging.

ORIGAMI

The Japanese paper-folding art has a huge amount of fun projects online. Check out some of our favourite Youtube video tutorials. Can you make this cute cat, the Jedi Master Yoda or the moving Flexagon?

MODULAR ORIGAMI

This involves making multiple copies of the same origami module and connecting them to create a complex geometric shape. Which of these can you make?

PAPER FLOWERS

Flowers... (sigh)... make you feel all warm inside. Here are some of our favourite Youtube tutorials. See what you can make or search for other flower creations online. This is a great idea for projects with the kids and with different coloured paper. There is no limit to what you can make!

PAPER AIRPLANES

Click on the airplane to the left to check out how to make record-breaking paper planes. Do you prefer darts or gliders?

NEED MORE IDEAS?

If you're after more paper project ideas then check out the following Youtube accounts, which offer a huge range of fun tutorials and ideas.
